

Why Calix and Clearcable

We have built a longstanding strategic partnership focused on delivering enhanced service offerings and support tailored to the needs of Canadian Broadband Service Providers.

Clearcable provides a one-stop-shop experience with local expertise:

- Offerings that provide a simplified path to deploying and managing a next-generation broadband network and subscriber services
- Strong presence in Canada with local insight and hands-on support
- Proven experience with the Calix Broadband Platform
- Technical post-sales support
- Managed services offerings tailored to your specific needs

Managed Services Designed to Deliver Exceptional Customer Experiences

Providing an end-to-end solution connecting the Calix Broadband Platform and solutions with the expertise to implement and support a streamlined operation.

Empowering Canadian BSPs to accelerate growth and deliver exceptional subscriber experiences—Calix and Clearcable combine industry-leading technology with local expertise and hands-on support.

Together, we simplify network deployment, streamline operations, and provide tailored managed services that help you thrive in a competitive market.

About Us

Innovative

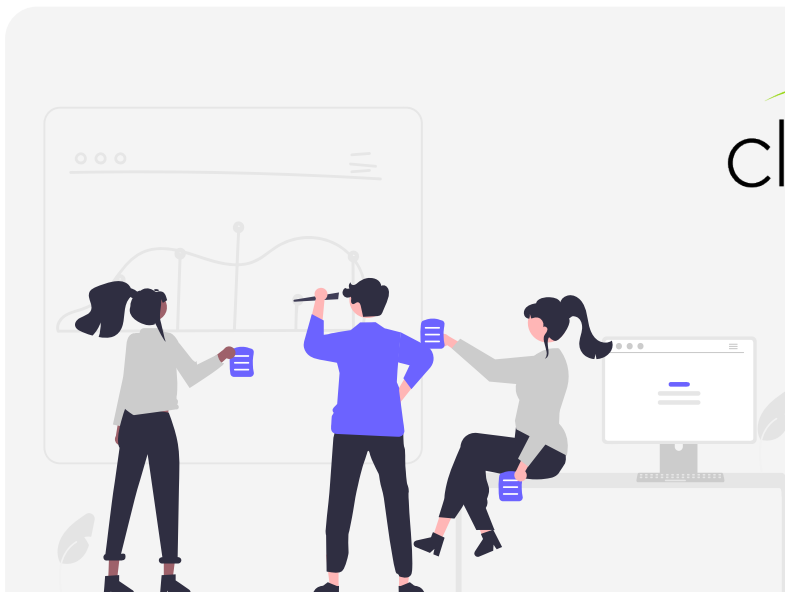

Innovation drives Clearcable. It allows us to deliver optimal solutions using state-of-the-art technology to simplify implementation and reduce operational costs.

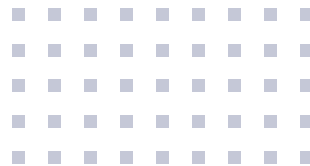

Reliable

Clearcable provides solutions that work and is always available to ensure those solutions deliver stability and dependability.

Trustworthy

Clearcable's technical professionals have the experience and industry insight to handle complex communications needs in a competitive environment with integrity and relevant references.
